Hampden Sidney

College.

One Hundred and Sixth Session.

ENDING JUNE 15, 1882.

Like many other institutions, Hampden Sidney long combined the functions of the Theological Seminary and the Preparatory School with those more strictly appropriate to the College. In time, however, its guardians were convinced that greater simplicity should be given to its aims and to its work.

Accordingly, the theological instruction of Hampden Sidney was transferred to Union Theological Seminary; and more recently the Prince Edward Academy has taken the place of the Preparatory School of the College. The former of these institutions is situated only a few hundred yards from the College, and the latter at the village of Worsham, about a mile distant. Though under distinct organizations, the three seminaries are intimately connected, and really co-operate; hence it has been thought proper to append to the Catalogue of the College that of the Academy.

FACULTY.

REV. J. M. P. ATKINSON, D. D.,
*President, and Professor of Moral Philosophy and Bible
Studies.*

L. L. HOLLADAY, A. M.,
Professor of Physical Science.

WALTER BLAIR, A. M.,
*Professor of the Latin Language and Literature, and of the
German Language.*

DEL. KEMPER, A. M.,
Professor of Mathematics, and Instructor in Engineering.

ADDISON HOGE, A. M.,
*Professor of the Greek Language and Literature, and of the
French Language.*

W. S. CURRELL, M. A., Ph. D.,
*Professor of the English Language, Literature and History,
and of Logic and Political Economy.*

L. L. HOLLADAY,
Curator and Clerk of Faculty.

WALTER BLAIR,
Librarian.

DEGREES.

CONFERRED JUNE 11, 1881.

Degree of BACHELOR OF ARTS upon

THEODORICK PRYOR CAMPBELL,	.	Hampden Sidney, Va.
THOS. WALKER GILMER,	.	Pulaski, Va.
ROGER MARTIN,	.	Danville, Va.
THOS. ED. PERKINSON,	.	Prince Edward Co., Va.
WM. WHAREY RICHARDSON,	.	Charlotte Co., Va.

The Degree of MASTER OF ARTS upon

PROF. JOHN R. SAMPSON,	.	Davidson College, N. C.
MR. GEORGE J. RAMSEY,	.	Rockbridge Co., Va.

The Degree of DOCTOR OF DIVINITY upon

RT. REV. BISHOP JAS. A. LATANE,	.	Baltimore, Md.
REV. M. L. HOUSTON,	.	Am. Presbyterian Mission, Shanghai, China.

The Degree of LL. D. upon

PROF. J. L. CAMPBELL,	.	Wash. & Lee University.

COURSE OF STUDY.

Freshman Class.

FIRST TERM.

Arithmetic, Venable.
 Algebra, begun, Ray, (Kemper's edition.)
 Geometry, begun, Wentworth.
 Original Problems in Mathematics.
 Cæsar, *De B. G.*, Virgil's *Æneid*, Allen & Greenough.
 Prosody.
 Latin Grammar, Bingham.
 Latin Prose Composition.
 Xenophon's *Anabasis*.
 Greek Grammar, Goodwin's latest edition.
 English Grammar and Punctuation.
 Weekly Compositions.

SECOND TERM.

Algebra, continued, Ray.
 Geometry, completed, Wentworth.
 Virgil, continued, Cæsar, *De B. Civ.*
 Latin Grammar, Bingham, and Allen & Greenough.
 Selections from Cicero's *Orations*, Allen & Greenough.
 Latin Prose Composition.
 Xenophon's *Anabasis*.
 Greek Grammar, Goodwin's latest edition
 English Grammar and Grammatical Analysis.
 Weekly Compositions.

Sophomore Class.

FIRST TERM.

Algebra, completed, . . .	Ray.
Problems in Mathematics.	
Cicero's Orations, Selections,	Allen & Greenough.
Livy, <i>Lib.</i> xxi, xxiii.	
Latin Grammar, . . .	Allen & Greenough; Zumpt.
Latin Prose Composition, weekly.	
Xenophon's Memorabilia.	
Greek Grammar, . . .	Goodwin's Elementary.
Evidences of Christianity, .	Alexander.
Higher English Grammar.	
Compositions twice a month.	

SECOND TERM.

Trigonometry, with applications,	Wheeler.
"Peirce's Tables of Logarithms," &c.	
Livy. Horace <i>Sat.</i> Prosody.	
Latin Grammar, . . .	Allen & Greenough, Zumpt.
Latin Prose Composition, weekly.	
Xenophon & Plato, . . .	Selections from the Memorabilia, Apology & Phædo.
Greek Grammar, . . .	Goodwin.
Greek Exercises.	
Evidences of Christianity, .	Alexander.
Rhetoric, . . .	Studies in Burke, Milton, Bunyan, &c., &c.
Compositions twice a month.	

Junior Class.

FIRST TERM.

Analytical Geometry, Plane.—Puckle.
Original Problems in Mathematics.
Chemistry—Lectures; Text-Books, Youman's Chemistry, and
Roscoe's Chemistry, with reference to Fownes, Cooke's
Chemical Philosophy.
Tacitus, *Dial. de Orat.*
Latin Grammar—Gildersleeve, Zumpt.
Latin Prose Composition, weekly.
Moral Philosophy—Text-Books: Alexander's Evidences of Chris-
tianity, Porter's Elements of Intellectual Science. Lectures
by the Professor.
Greek Grammar.—Thucydides—Exercises.
Handbook of Early English.—Morris and Skeat.
Morris's "Outlines of English Accidence."
Monthly Compositions.

SECOND TERM.

Analytical Geometry, Solid—Aldis.
History and Philosophy of Mathematics.
Chemistry—Lectures and Text-Books as in first term, and
Wagner's Technology.
Latin, Tacitus, Agricola, or Quintilian's *Inst. Orat. lib. x.*
Thucydides.
Goodwin's Syntax of the Greek Moods and Tenses.
Greek Exercises.
Mental Philosophy. Porter's Elements of Intellectual Science.
Logic. Bowen. Lectures by the Professor.
Agricultural Chemistry.—Lectures, with Johnston's Agricultural
Chemistry as Text-Book.
Physiology—Dalton's.
Morris's "Outlines of English Accidence," studies in Shakspeare,
Chaucer and Langley. English Literature.
Monthly Compositions.

Senior Class.

FIRST TERM.

Natural Philosophy.—Text-Book, Norton's Natural Philosophy.
Bartlett's Mechanics.
Thucydides and Demosthenes.
Goodwin's Syntax of the Greek Moods and Tenses.
Greek Exercises.
Logic.—Bowen.
Moral Philosophy.—Butler's Analogy and Alexander's Moral Science. Lectures by the Professor.
Mental Philosophy.—Lectures by the Professor.
Infinitesimal Calculus.—Byerly, Todhunter.
March's "Anglo-Saxon Grammar and Reader," Corson's "Hand-book of Anglo-Saxon and Early English," Whitney's "Language and the Study of Language."

SECOND TERM.

Astronomy.—Newcomb and Holden's.
Geology.—Dana, Le Conte.
Political Economy.—Say.
Moral Philosophy.—Butler and Alexander, Dabney's Sensualistic Philosophy. Lectures by the Professor.
Terence.—Edition of Fleckeisen.
Latin Prose Composition.
Latin Grammar.—Gildersleeve, Zumpt.
Dissertations and Forensics, through the year.
Applications of the Calculus.
Lectures on some of the Modern Mathematical Theories and Methods.
History and Philosophy of Mathematics.
Continuation of the same studies in English. In the Senior Class two Theses will be required, one each term.

INSTRUCTION IN GERMAN.

TEXT-BOOKS.—First Year.—*Sheldon's Short German Grammar* ;
Whitney's German Grammar ; *Whitney's German Reader*.

Second Year.—*Whitney's German Grammar* ; *Bodenstedt's Translation of "Hamlet,"*
Freytag's "Die Journalisten," *Schiller's Wilhelm Tell*.

Flugel's Dictionary is recommended. Students advanced as far as the second year will find advantage in consulting *Whitney's Grammar* and *Heyse's Schulgrammatik*.

INSTRUCTION IN FRENCH.

TEXT-BOOKS.—First Year.—*De Vere's First French Reader* ;
Languellier and Monsanto's Practical French Course ; *About's Roi des Montagnes* is given for private reading.

Second Year.—*Same French Grammar, Roi des Montagnes*, is finished. *Spiers' and Surenné's Dictionary* is recommended.

Some other book will be given for private reading.

Moral Philosophy.

By the recent change in the curriculum, Logic and Political Economy have been transferred from the department of Moral Philosophy to that of English, while Alexander's Evidences has been placed among the subjects embraced in Biblical Instruction. Thus, the topics treated of in the class of Moral Philosophy are all included in the course of Mental Philosophy and Moral Philosophy proper. In this department, the text-books for the Junior year will be *Porter's Elements of Intellectual*

Science, a Compulsory, and Butler's Analogy, an Alternative Study.

In the Senior year, the text books will be Alexander's Moral Science, a Compulsory, and Dabney's Sensualistic Philosophy, an Alternative. There will be in each class three recitations a week, and in both years as many lectures will be given as the time of the student will enable him to receive. Besides that compositions which will be required of them, as of all students, by the Professor of English, the members of the Junior and Senior classes will be expected to prepare essays on topics assigned in Psychology, Metaphysics and Ethics.

Biblical Instruction.

Hitherto, all students of the College have been required to attend together a Bible-class on Sunday. In this class, recitations were not graded. Desirous to secure for our pupils a more thorough acquaintance with Biblical Science than could be given through the sole use of this means, the authorities of Hampden Sidney have determined to devote one recitation of every secular week to Biblical Instruction. On these recitations students will be graded as on other parts of the course, and proficiency in Biblical Science will be indispensable to graduation.

In this department, the Freshman Class will be occupied with the study of the facts of Old Testament History, and the only text-book for this year will be the English Version of the Bible. The Sophomores will give special attention to the Evidences of Christianity. Text-books—Alexander's Evidences and the Bible. The Junior Class will study the connections of Sacred and Profane History with special reference to the light cast by the latter on the interpretation of Scripture, and the arguments it affords for the authenticity and truth of the Bible record. The text-books for this year will be Prideaux's Connections and the Bible.

The Senior Class will complete Prideaux and add a condensed view of the facts and doctrines of the New Testament. The text books will be those of the preceding year—Prideaux and the Bible.

For the Sunday's recitation in this department, the text book will be Nicholls' Help to Reading the Bible.

Mathematics.

In the Mathematical department the several portions of the science are taught in the order given in the "Course of Study." The careful, systematic study of the text-book is supplemented, when necessary, by explanatory lectures, and the progress of the student is tested by occasionally requiring the solution of original problems related to the work of the class-room. The successful pursuit of the studies assigned to the Freshman and Sophomore Classes is required in order to the attainment of any of the collegiate degrees here conferred; but, as is set forth elsewhere, (p. 20) the studies of the Junior and Senior years are hereafter to be *elective*. This feature, it is believed, will lead to an enlargement of the course heretofore insisted on, so as to embrace more of the practical applications of the Calculus, the Theory of Probability, Determinants, Quaternions, &c.

TEXT-BOOKS.—Venable's *Arithmetic*; Ray's *Algebra*, (Kemper's edition); Wentworth's *Geometry*; Wheeler's *Trigonometry*; Puckle's *Algebraic Geometry*; Byerley's *Calculus*.

Course of Study in Latin.

The following is a description of the course of study in Latin as now arranged. The same course will be pursued for the coming year by students now in college. For the future, however, all new applicants for admission into the Freshman, Sophomore, or Junior classes will be expected to possess the attainments required in the description below of applicants for the Sophomore, Junior and Senior classes, respectively. That is, applicants for admission into the Freshman class must be prepared to pursue the studies below marked out for the Sophomore class, &c.

FRESHMAN CLASS.

Candidates for admission in the Freshman Class are expected to have a good acquaintance with the forms of Declension and

Conjugation, and with the leading rules of Syntax as laid down in some grammar arranged for beginners, as Bingham's. They are expected also to have such facility in translating Latin prose into English as may be assumed in ordinary cases to be the result of two years' practice in this exercise, at the age of, say, 14-16.

The Freshman Class will be engaged during the first half session on the Syntax of Bingham's Latin Grammar; on one of the Books of Cæsar's Commentaries *de Bello Gallico*, and on a part of the first Book *de Bello Civili*, by the same author.

During the second half session this class will study the first part of Allen & Greenough's Grammar; the Prosody of Bingham's Grammar; and will read one of the Books of Virgil's *Æneid* (chiefly for scanning), and three of Cicero's Orations against Cataline.

EDITIONS OF TEXTS.

For Virgil and Cicero, the editions of Allen & Greenough's are recommended; for Cæsar *de Bello Civili*, a simple text in a Leipsic edition.

SOPHOMORE CLASS.

The Sophomore Class will read, during the first half session, Cicero's Orations *pro Milone* and *de Imperio Cn. Pompeii*, and will study the Syntax and Prosody of Allen & Greenough's Grammar (revised edition). During the second half session this class will read Selections from the Satires or Epistles of Horace, and the twenty-first and part of the twenty-second books of Livy. Exercises in the translation of English into Latin are furnished and required weekly throughout the year. In connection with these exercises, Zumpt's and Gildersleeve's Grammars are used.

EDITIONS OF TEXTS.

Chase's Edition of McLean's Horace, Allen & Greenough's Edition of Cicero, and Chase and Stuart's Edition of Livy, are recommended.

JUNIOR CLASS.

The Junior Class will read Tacitus' *Dialogus de Oratoribus* and *Agricola*, or Quintilian's tenth book, *Instit. Orat*; and study the Syntax of Gildersleeve's Latin Grammar. Zumpt's Grammar is used in connection with weekly exercises of translations from English into Latin.

NOTE.—Since the publication of the Catalogue, the action of the Board of Trustees (taken in last June) raising the standard of the entrance examinations in Latin and Greek, has been repealed; so that the requirements for entering the College classes remain as they were in 1880-81.

EDITIONS OF TEXTS

For Tacitus, a Leipsic edition of the simple text is recommended; and for Quintilian, Bonnell's edition.

SENIOR CLASS.

The Senior Class will read two or three of the Comedies of Terence, and, if there is time, something of Juvenal. This class is expected to use Gildersleeve's and Zumpt's Grammar in private; and one-sixth of its time spent in the study of Latin is devoted to the writing of exercises.

Studies in poetry, grammatical criticism and composition will be offered for election to members of the Senior Class.

The final examination for graduation embraces a review of the whole previous course, and includes an *extempore* Latin composition.

Greek.

Candidates for the Freshman Class must be *well* prepared on forms; must have spent a year or more in reading Greek, and have studied the elementary principles of Syntax.

The Sophomores read extracts from the *Memorabilia*, and from Plato's *Apology* and *Phædo*.

In the Junior and Senior Classes the attempt is made to give the student a clear understanding of the main principles involved in the Syntax of the Greek verb, and to cultivate more fully the habit of translating Greek into idiomatic English. The authors read are mainly Thucydides and Demosthenes.

Expense in the purchase of books may be avoided by getting Goodwin's Greek Reader (latest edition, containing the first two books of the *Anabasis*), and Boise and Freeman's *Selections from Greek Authors*. These two books contain extracts from the Attic writers sufficient for most of the reading done with all the classes.

The exercise of turning English into Greek is attended to as fully as is justified by the time allotted to this department.

No Greek is read outside of Attic prose. Those who know anything about it will testify that even a tolerable mastery of its forms, syntax, and vocabulary, is abundant work for three years of a college curriculum. To introduce another dialect would only result in confusing the student, and leave him without suf-

ficient degree of acquaintance with either dialect. This by way of explanation to any who may feel scandalized at the exclusion of Homer.

Physical Science

Is taught in the Junior and Senior Classes. The attention of the Junior Class is first given to a consideration of the general properties of matter, and of the forces manifested in cohesion, adhesion, capillarity, endosmose, crystallography, etc.

The subject of HEAT is then taken up and studied carefully and quite fully. Its intimate relations to other modifications of motion and force are impressed upon the attention. Light is studied so far as is thought useful before entering upon the study of Chemistry. Electricity in its various modifications, and with its many useful applications, next occupies the attention of the class. Theoretical Chemistry, Inorganic and Organic Chemistry (including Physiological Chemistry to some extent), and Agricultural Chemistry, are studied in the order given. The subjects are taught both by text-books and by lectures, and illustrated by experiments. Opportunities of exhibiting and impressing upon the attention the useful applications of Chemistry are improved so far as possible.

The Senior class enters upon the study of Mechanics, including the Laws of Motion and the operation of the various forces of nature, as manifested in solids, liquids, and gasses. The subject of vibrations and undulations is considered by way of preparation for the study of Acoustics and Optics, which latter is dwelt upon at much greater length and with much more particularity than could be done in the Junior Class.

Astronomy and Geology occupy the time of the class for the remainder of the session. With the use of the text-books the Professor makes such additions, suggestions, criticisms, or regular lectures as may seem important or necessary to the full elucidation and understanding of the subjects taught. Together with instruction in Science, an effort is made to impart valuable information in regard to practical matters. Opportunities for elective study in Technology and Mechanical Philosophy will be offered.

The text-books in this department are, in the Junior Class, Youman's and Roscoe's *Chemistry*, Johnston's *Agricultural*

Chemistry, and Cooke's *Chemical Philosophy*. In the Senior Class, Norton's *Natural Philosophy*, Wagner's *Chemical Technology*, Newcomb and Holden's *Astronomy*, Dana's *Text-Book of Geology*, Le Conte's *Geology*, and Bartlett's *Mechanics*.

German Course.

The course of instruction in German is arranged so as to be completed in two years. The nature of the instruction is indicated by the books which appear elsewhere in tabular statement. Translations into German during the first year are oral; during the second year the same are to be oral and written.

French Course.

This is continued through two years, with two recitations a week the first year, and one a week the second year. The aim in this short course is to give the student as good a reading-knowledge of French as can be imparted in this time. During the first year one main feature is the thorough study of the *verbs*, regular and irregular. The books used will be found elsewhere.

English Course.

ENGLISH, LOGIC AND POLITICAL ECONOMY.

In the department of English are taught the English Language, Rhetoric, and English Literature. The course of study already given is the one that will be followed, as far as practicable, after the session of 1882-'3. For the present, however, owing to the fact that the compulsory study of English has just been introduced, the Freshmen and Sophomores will pursue together the studies mapped out for the Freshmen; the Juniors will take the studies of the Sophomore Class, and the Seniors a course in Rhetoric and English Literature, supplemented by Lectures on the English Language. The History of England and that of the United States are taught in the Junior and the Senior Class, and are classed among the Elective Studies. To Logic and Political Economy two sessions will be devoted, the first being taught in the Junior Class, and the second in the Senior.

TEXT-BOOKS.—In Logic, Bowen; in Political Economy, Say; in English History, Green. The other text-books will be on hand at the opening of the session.

Civil Engineering

Is taught by the Professor of Mathematics to those few students who desire such instruction ; provided their state of preparation is such as to warrant their entry on technical study with reasonable hope of success. Special fee for instruction in this course, \$25.

General Remarks.

A course of Biblical Instruction has been added to the curriculum of the College, and the course of English very much enlarged and improved.

At present each class will recite twice a week on Bible Studies.

The Freshmen will recite five times a week on Mathematics, and four times on Latin and Greek each, and twice a week on English.

The Sophomore Class an equal number of times on the same studies, all of them being compulsory.

In compulsory studies the Junior Class will recite twice a week on Moral Philosophy, Latin and Greek, and three times on Physical Science and on English, Logic, etc.

The Senior Class twice a week on Moral Philosophy, and on English, Political Economy, etc., and four times on Physical Science.

In Elective or Alternative Studies the Junior Class will recite three times a week on Mathematics, and once a week respectively on Moral Philosophy, Physical Science, Latin, Greek, and English, while the Senior Class will recite twice a week on Mathematics, and once a week respectively on Moral Philosophy, Physical Science, Latin, Greek, and English.

In French and German there are two classes, the Junior and the Senior. In the Junior Classes there are two recitations a week for each, and in the Senior one.

In order to graduation in the regular curriculum, the compulsory studies must all be taken, and of the elective and alternative, either *all* of the mathematics or any *two* of the others.

Hampden Sidney professes to be a college merely, and not a university. She retains a curriculum of study which long time and varied experience have proven to be best adapted to effect a *liberal* education, as distinguished from education of a purely

business or professional character. Students are prepared for the professional schools, whether secular or religious, of the very highest grade, or fitted for the proper discharge of the duties of an enlightened citizen. Believing that the culture of all the mental faculties, designed to be here accomplished, is best effected by the complete and thorough mastery of what is taught, the catalogue of text-books is not so extended as to necessitate the hasty, superficial, and imperfect study and acquisition of the contents of books written on a vast number of subjects, however valuable and important in themselves.

As everything cannot be taught within four years to youth of ordinary abilities, the attempt to do so is not made; but rather to do well and thoroughly what is professed to be done.

Admission.

CANDIDATES for admission into the College are examined by the Faculty, and placed in the class which they are prepared to enter. A preliminary examination on Geography, Orthography, and English Grammar, is required of all students before standing the regular examinations of the College. Candidates for admission into any particular class must stand an examination on *all* the course previously pursued by the class. In *all* cases the candidate is required to present satisfactory testimonials as to the moral character and standing in the institution which he *last attended*.

Students desiring to pursue a particular branch of study, are permitted to enter any class in College for which they are found prepared, subject, however, to the direction of the Faculty, in the amount of study required, which shall in all cases be equal to that of regular students.

Religious Exercises.

STUDENTS are required to attend prayers in the chapel, Bible-Class on Sunday, and Church in such place as their parents or guardians shall request; or, without such request, in the place appointed by the Faculty.

Monthly Circulars.

EACH Professor keeps a daily record of the attendance and recitation of the members of his classes, and at the end of every month a statement of the average standing in scholarship, the number of absences from recitations, chapel and church, and of the failures to recite, together with any improper deportment requiring particular notice, is transmitted to the parent or guardian of each student in the institution.

Examinations.

BESIDES the preliminary examinations on English studies, there are two examinations of all the classes, one in the middle of the session, and another at the close, conducted by each Professor in his own department. These examinations are usually written, but may be either oral or written, or both combined, and are designed to test thoroughly each student's knowledge of the studies of the session. The classes are divided into four divisions or grades, according to the results of the examination, and their sessional standing. Those in the first grade are announced at Commencement as distinguished. Those in the second grade are sustained and permitted to advance with the class, while those in the third grade cannot advance until they have been sustained on re-examination. Those in the fourth grade are not entitled to a re-examination, which, however, in certain cases may be granted by the Professor in charge.

The members of the Senior Class are examined on all the studies of the course four weeks before Commencement.

Public Exhibitions.

STUDENTS of the Senior Class deliver original orations in the chapel at intervals during the session, and representatives from each of the Literary Societies, together with the members of the Junior Class, on the 22d of December.

Vacation and Commencement.

COMMENCEMENT occurs annually on the Thursday following the second Tuesday in June. The vacation follows the annual Commencement, and continues until the first Thursday of September. The Literary Societies hold their anniversary meetings on Tuesday and Wednesday evenings before Commencement, and a public address is delivered before them also by a literary gentleman appointed for the occasion on the day before Commencement. The Alumni are addressed on Commencement day by one of their number.

Every student is expected to enter punctually on the first day of the session, or present to the Faculty satisfactory reasons for absence. Parents and guardians cannot be too careful in seeing that this rule is observed, for the loss of a few days at the beginning of a session is almost invariably followed by a loss of grade in class, and always subject the students to hurried and embarrassed study. Parents and guardians are also earnestly requested not to permit their sons or wards to be absent during the College term.

Degrees.

I. BACHELOR OF ARTS.

The degree of Bachelor of Arts is conferred,—

(1), Upon those who complete in a satisfactory manner the course of study as taught in Moral Philosophy, Physical Science, Mathematics, Latin, Greek, English, Logic, and Political Economy; and

(2), Upon those who modify the course of study just indicated, by omitting *one* of the Ancient Languages, and studying in lieu thereof *both* French and German; as also

(3), Upon those who may prefer to modify the course by dropping *one* of the Ancient Languages at the close of the Sophomore year, and substituting for it *either* French or German.

This degree may, therefore, be reached by any one of these somewhat different courses.

II. BACHELOR OF SCIENCE.

This degree is given those who complete the course, as here taught, in Moral Philosophy, Physical Science, Mathematics, French, German and English.

III. BACHELOR OF LITERATURE.

The course necessary to the attainment of this degree includes Latin, Greek, French, German, English, Moral Philosophy, and somewhat shortened courses in Mathematics and Physical Science.

IV. MASTER OF ARTS.

The degree of Master of Arts may be conferred on graduates of two years' standing who present satisfactory evidence of having devoted themselves to study, and a written thesis, to be examined and reported upon by a joint committee of the Board of Trustees and Faculty of the College.

Expenses.

Tuition for the year.....	\$60 00
Room rent for the year.	12 00
Fee for contingent expenses....	7 00
Matriculation fee.....	10 00
Deposit (which is returned if no damage is done).....	5 00
Board, \$2.50 per week, half in advance, in September and January.....	100 00
Washing, per month, \$1.25.....	12 00

Wood, \$1.50 to \$2 per cord, variable, say \$10.

Board in private families, from \$10 to \$12 per month.

Members of the Junior Class in Chemistry pay a fee of \$7.

Students who enter on the scholarships pay no tuition fees, but are liable for all the other charges, *which, as well as the tuition fees, must be paid in advance.* The incidental expenses will depend upon the habits of the student and the allowance from home. There is no more fruitful source of injury to the student than too large a supply of pocket money.

Sons of Confederate soldiers killed in battle are admitted free of tuition.

Candidates for the gospel ministry pay tuition fees, or not, as they prefer. The Faculty may remit all charges for tuition to sons of ministers of the gospel whenever it is desirable to do so.

Halls and Libraries.

The halls of the Literary Societies are fitted up with great taste and neatness, and the libraries, containing about 3,500 volumes each, have been selected with care.

Location, Remarks, &c.

HAMPDEN SIDNEY COLLEGE is situated in Prince Edward county, Va., and is reached by daily stage from Farmville, which is on the Southside portion of the Norfolk and Western Railroad. The locality is proverbially one of the most healthy in Virginia. Union Theological Seminary is in its immediate vicinity, and the students of either institution have access to the lecture rooms and libraries of the other, free of charge. The College is surrounded by a community distinguished for intelligence, morality, and piety, in the families of which students may enjoy all the social advantages consistent with a life of study. Its quiet situation in the country, removed from the bustle of life, and from the temptations incident to town or city, associated with the above named advantages, renders this College one of the most desirable retreats to every student who aims to secure the thorough culture of his mind and heart, and the formation of correct ideas.

Communications on business should be addressed to the President,

REV. J. M. P. ATKINSON, D. D.,
Hampden Sidney College, Prince Edward Co., Va.
